

## Week of 6/26/2023 Operations Update (26)

This week saw a big spike in floodwater mosquito activity with aerial adultciding in response. The bar graph below shows the total number of adult mosquitoes from all traps in the District for the past year (TTM).

What began last week with a modest increase floodwater mosquito activity intensified this week. Typically spikes in floodwater mosquitoes are more abrupt.

**Malaria Cases Acquired in Florida:** Two cases of locally acquired malaria were reported this week in Sarasota County. In 2023, six cases of locally acquired malaria have been reported, all in Sarasota County.
